Rosby Estate

Home to the premium “Rosby Shiraz” and “Rosby Cabernet Sauvignon”.

Rosby is located 10 km North-East of Mudgee. The unusual soil types surrounding mountain ranges create unique characteristics only found in these wines.

The vineyard is grown on the slopes of the adjoining ranges in a true North, South direction maximizing the benefits of the gentle morning light while providing shade from the harsh afternoon sun.

The unusual soil types are red basalt over a quartz gravel structure, providing a free draining soil. This allows the vines to become deep rooted in their search for moisture and nutrients, providing unique characteristics evident in their wines.

The vineyard is grown mimicking dry-land techniques with minimal water inputs applied at critical growth stages of the vines. This technique escalates the characteristics that these premium wines have to offer.

Rosby Vineyard is a truly unique piece of land drawing on what nature has to offer to produce premium wine.

Regards

Paul Baguley
